A514 Range of Oil - Free Power Pack Compressor units for use with Rol-Trac & RolAirMota Automatic systems.

Models have optional Quiet\*\* (with acoustic hood) or Heavy Cycle\*\* variations with a choice of either separate mounts, or possible inclusion within the Rol-Trac system.

The feature allows the pump unit to only run when the Rol-Trac or RolAirMota is moving. This means minimum running costs without an air receiver and instant response.

Very safe ... No air pressure storage... Economical operation ... Instant response .... No oil to change or check.... ....No Water to drain.....

SIMPLE COMPRESSED AIR ... EASY TO USE

\*\*Adding the Acoustic Hood reduces pump cooling. If the application requires frequent or sustained operation, the Power Pack should be remote positioned, in a well ventilated area without the hood. An efficient thermal overload is included to protect the machine at high temperature.

Model	A514	A515
HP	0.5	1
V (std)	220-240	220-240
Hz	50	50
Speed	1440	1440
Lubrication	Oil-free	Oil-free
