

Pull Cord control unit to provide Zone 1 rated intrinsically safe signals to initiate the door sequence.

Each pull switch is made up of a charge piston with a 2-metre Red PVC operating rod. The 0A181 kit comprises 2 pull switches and a central control box and 10 metres of interconnecting tube.

The pull switch should be suspended at suitable distance from the door on the main approach routes.

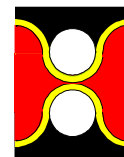

Specification

Charge piston :..... Stainless piston and Barnett
..... Aluminium
Anodised end caps.
Pull switch operating rod ... Red PVC
10mm dia.

Optional Extras

0A185 1-metre pull cord steel gantry
0A186 2-metre pull cord steel gantry

Parts:
6C234 PC Cylinder
6S067 Micro Valve
6S210 Pressure Switch
